SUMMARY

Data Science Engineer with 2 years of experience designing and deploying machine learning models in production. Experienced in Python, Scikit-learn, TensorFlow, and PyTorch, with hands-on production deployment via Flask APIs. Holds a B.Tech in Computer Science (2024) with applied work in customer churn prediction, computer vision, ensemble modeling, and few-shot learning. Seeking a full-time role in Data Science, Machine Learning Engineering, or AI Development.

WORK EXPERIENCE

Data Science Engineer

Feb 2024 - Present

VIVAX.IN

- Developed classification and regression models for customer behavior analysis, increasing prediction accuracy by 18%.
- Deployed predictive models via Flask REST APIs serving 500+ daily requests in a production environment.
- Trained a customer churn prediction model using Random Forest, achieving 82% accuracy and retaining 12% more customers.
- Wrote Python automation scripts for daily reporting workflows, reducing manual processing time by 70% (approximately 10 hours per week).
- Reduced feature noise by 35% across recurring projects by standardizing data cleaning and transformation pipelines.

Software Development Intern

Sep 2022 - Nov 2022

NBLIK

- Redesigned the analytics dashboard UI, increasing average user session duration by 40% per engagement metrics.
- Refactored dashboard modules to align with brand guidelines, improving brand consistency scores by 25% in user surveys.
- Built an equipment monitoring module for production processes, reducing unplanned downtime by 20% and improving customer satisfaction scores by 15%.

PROJECTS

Personalized Loan Demand Prediction

Jan 2025

MachineHack Hackathon | Python, XGBoost, LightGBM, CatBoost, Scikit-learn, Pandas, NumPy

- Engineered regression models to predict loan amounts for a financial institution's personalized lending platform.
- Cleaned and transformed 10,000+ customer records: handled 95% missing values, removed outliers, and selected features to cut noise by 30%.
- Tuned 4 ensemble models (Random Forest, XGBoost, LightGBM, CatBoost) using GridSearchCV and RandomizedSearchCV over 100+ parameter combinations.
- Ranked in the top 15% on the final leaderboard among 500+ competition participants.

Real-Time Face Detection and Counting System

May 2024

Python, YOLOv4, OpenCV

- Configured and fine-tuned YOLOv4 on a custom face dataset of 5,000+ annotated images for real-time detection.
- Achieved 92% mean Average Precision (mAP) with a processing speed of 30+ FPS, suitable for live video stream deployment.

Low-Resource Image and Text Classification using Meta-Learning

Mar 2026

Python, PyTorch, HuggingFace Transformers, CLIP, Scikit-learn

- Designed a meta-learning pipeline using Prototypical Networks and MAML for image classification, reaching 80%+ 5-way accuracy with only 5 labeled samples per class.
- Applied CLIP (vision-language model) for zero-shot image recognition, enabling classification of unseen categories using text descriptions alone.
- Evaluated prompt-based inference with HuggingFace Transformers on low-resource text classification tasks, cutting annotation requirements by 90% versus fully supervised training.
- Benchmarked zero-shot vs. few-shot vs. supervised approaches across datasets with fewer than 50 training samples; documented trade-offs in accuracy and generalization.

EDUCATION

B.Tech, Computer Science and Engineering

Amity University, Lucknow Campus | Lucknow, India

May 2024

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript

ML Frameworks: Scikit-learn, TensorFlow, PyTorch, Keras, XGBoost, LightGBM, CatBoost

Computer Vision: OpenCV, YOLOv4, Object Detection, Image Processing

NLP / LLMs: HuggingFace Transformers, CLIP, Prompt Engineering, Meta-Learning

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Tableau

MLOps / Tools: Flask, Git, GitHub, Postman, Jupyter Notebook, VS Code, AWS

Databases: MySQL, MongoDB, Excel

CERTIFICATIONS AND ACHIEVEMENTS

- Git and GitHub - Udemy (Certificate of Completion)
- MachineHack Hackathon - Ranked top 15% among 500+ participants, Jan 2025
- Internship Certificate - NBLIK, via Internshala, Nov 2022
- LeetCode - 170+ problems solved across Data Structures and Algorithms (Username: shyam0056)
